*This paper consists of 7 Printed pages.
Candidates should check the question paper to ensure that all the
Papers are printed as indicated and no questions are missing*

SECTION A (40 MARKS)

Answer all Questions in this section in the spaces provided.

1. List two devices that use micro-electronics in their operations (2mks)
.....
.....
2. State two applications of mark sensing (1mk)
.....
.....
3. a) Name two ways in which data can be input into a computer, and state the device that can be used in each case. (2mks)
.....
.....
b) Explain why a buffer is used in the output of data to a line printer (1mk)
.....
.....
4. Explain the purpose of the following types of memory (2mks)
i) ROM.....
.....
ii) RAM
.....
5. What is a peripheral device (1mk)
.....
.....
6. Give two reasons why computers need backing storage (2mks)
.....
.....
7. a) List any four high level programming languages (2mks)
.....
.....
.....
.....
b) Distinguish between compilers and interpreters (2mks)
.....
.....
.....
.....

8. a) Explain the term DOCUMENTATION as used in computer software (2mks)

.....
.....
.....

b) State one application of DOCUMENTATION (1mk)

.....
.....
.....

9. State four ways in which computers and their related technology are used in medical research (2mks)

.....
.....
.....

10. Differentiate between computer Aided Instruction (CAI) and computer Aided Learning (CAL) (2mks)

.....
.....
.....

11. Give one function of a primary key (1mk)

.....
.....
.....

12. a) Describe simulation in relation to computers (2mks)

.....
.....
.....

b) Briefly discuss VIRTUAL REALITY in computers (3mks)

.....
.....
.....

c) State two benefits to retailers who use E-POS (2mks)

.....
.....

13. a) List two types of paper orientation (2mks)

.....
.....

b) Name two keys used to delete text in a document (2mks)

.....
.....

14. a) Identify two different applications in a school that might be implemented by using a spreadsheet package (2mks)

.....
.....

.....
.....
.....
.....

15. Translate the hexadecimal number 8E into (2mks)

a) Binary

b) Denary

SECTION B (60 MARKS)

Answer Question 16 and any other THREE questions from this section in the spaces provided.

16. a) Design a pseudocode that requests the user to enter a temperature in degrees centigrade, calculates the corresponding temperature in degrees Fahrenheit and prints the given temperature and the converted value. (8mks)

.....
.....
.....
.....

.....
.....
.....
.....
.....

b) Draw a flowchart of the above pseudocode you have designed (4mks)

c) Describe the three essential programming constructs which form the basis of structured programming (3mks)

.....
.....
.....
.....
.....
.....

17. A school has decided to network its computers so that it can distribute information over a local intranet. The school also intends to connect the local network to the Internet.

a) Describe three different topologies that could be used to network the computers (6mks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

.....
.....
.....
.....

b) The various services are to be provided by servers. Briefly describe the services provided by (6mks)

- i) Print server
- ii) Internet server
- iii) intranet server

c) Electronic mail (E-mail) is very popular. Explain how you would prepare and send a message using e-mail (3mks)

.....
.....
.....

18. a) Explain how you can defend your files from the following risks (8mks)

- i) Fire in the computer
- ii) Hackers
- iii) Virus attack
- iv) Disgruntled ex-employees

b) Differentiate between private data and confidential data (4mks)

.....
.....
.....
.....

c) List three sources of viruses (3mks)

.....
.....
.....

.....
c) How does a bank prevent its customers from withdrawing more money than they have
in their account? (3mks)

.....
.....
.....
